Education

Bachelor of Computer Science Major

June 2026

Carleton University

Experience

Data Analytics Specialist

Jan 2025 – Dec 2025

StudySuccess.org

Remote

- Standardized and transformed student and applicant data from multiple sources using **Python** and **SQL**, improving data quality through validation, and pre-processing for analytics and **machine learning** workflows.
- Conducted cohort, funnel, and trend analyses to evaluate applicant behavior, recipient outcomes, and program performance, delivering actionable insights to support data-driven decision making.
- Designed and maintained **Power BI** dashboards and automated reporting pipelines, enabling stakeholders to monitor key performance indicators, application trends, and operational performance.
- Optimized data collection processes, define reporting requirements, and communicate analytical findings through clear reports and visualizations.

Data Analyst / Data Scientist Intern

Sep 2023 – May 2024

Financial Consumer Agency of Canada

Ottawa, ON

- Prepared and analyzed **large-scale consumer complaint records** using Python and SQL to improve data quality and support the development of an **NLP** model for automated complaint classification.
- Developed and evaluated NLP models to classify **10,000+ consumer complaint records**, experimenting with text preprocessing and machine learning techniques to improve automated complaint categorization.
- Automated **ETL workflows** using Python and SQL, reducing manual processing by **30%** and preparing structured datasets for downstream analytics and machine learning.
- Developed Power BI dashboards and documented analytical workflows, enabling internal teams to monitor results and improving knowledge sharing across the data team.

Technical Operations Lead

Mar 2026 – Present

BladeX Education (Non-profit)

Remote

- Joined the founding team to lead technical operations, developing and maintaining the organization's website and **Supabase** backend supporting education services.
- Organized AI adoption initiatives by introducing productivity tools and workflows to interns, improving operational efficiency across the organization.

Projects

Canadian Housing Prices: Booms, Corrections & Regional Divergence

[Project Link](#)

Python • SQL (BigQuery) • Tableau

- Analyzed **34,026** Statistics Canada NHPI records across **27 CMAs** to identify housing booms, corrections, and long-term regional trends.
- Cleaned and transformed data using Python and SQL, applying window functions and statistical aggregations.
- Built interactive visualizations explaining COVID-era acceleration and regional market divergence.

Technical Skills

Programming: Python (pandas, NumPy, scikit-learn), SQL

Analytics: EDA, ETL, Data Cleaning, Statistical Analysis

Machine Learning: NLP, Classification, Model Evaluation

Visualization: Power BI, Tableau, Excel

Tools: Git, Jupyter Notebook, Google BigQuery
